

# MasterFinish FW 324

May 2022 repl. April 2021

**MasterFinish FW 324 is used for concreting at difficult strippings, for instance recesses, pin bolts and cases.**

## FEATURES:

MasterFinish FW 324 is mould wax with chemical/physical effect which reduces the friction during stripping.

## APPLICATION PROCEDURE:

MasterFinish FW 324 is ready for use.

Before use the mould should be cleaned thoroughly.

It is applied by means of a brush, roller or cloth.

MasterFinish FW 324 can be applied at temperatures down to -15°C.

In consideration of the consumption and the application the temperature of the mould wax should be above 0°C.

Overdosage and application difficulties will increase in proportion to the decreasing temperature of the mould wax.

## Storage:

MasterFinish FW 324 is to be stored at temperatures between 0°C and +20°C in sealed package.

If stored as prescribed, the shelf life is 1 year.

## Packaging

15 l bucket

## SUSTAINABILITY

MasterFinish FW 324 is classified, with regards to Berufsgenossenschaft der Bauwirtschaft (BG BAU), as GISCODE: BTM10.

## WORKING CONDITIONS

See separate safety data sheet/instructions.

MAL-kode: 00-1 (1993)

Reservations for changes and misprints.

Technical data	
Product	Mould wax
Active constituents	Paraffin wax, refined mineral oil
Density (20°C)	Approx. 0,85 kg/l
Flash point:	>100°C
Appearance	Yellow paste
