Re: DGNB Requirement ENV 1.2 (QS4) for products **Preprufe Tape LT, Preprufe Sanded Tape & Bitustik BT**, manufactured by **De Neef Construction Chemicals BVBA**.

Dear Sir /Madam,

Based on our raw material supplier information and process knowledge, we can state that the above products meet the DGNB requirement (ENV1.2 QS4) of no proof EU Taxonomy criteria for the SVHC limit value of $\leq 0.1\%$.

ECHA's Candidate List of substances of very high concern:

<https://echa.europa.eu/candidate-list-table>

Chemicals/substances that are particularly dangerous in terms of the following toxic end points are classified as being of very high concern:

- Carcinogenic, mutagenic and toxic to reproduction (CMR substances category 1A and 1B < 0,1%),
- Persistent, bioaccumulating and toxic (PBT)6 ,
- Very persistent and very bioaccumulating (vPvB) or
- Of similar concern (e.g. endocrine disruptors).

If you have any further questions, please do not hesitate to contact me.

Yours sincerely,

A handwritten signature in blue ink that reads "P. Oliver".
