February 23, 2021

Dear customer,

Initially, we at HauCon would like to take the opportunity, to thank you for the cooperation in the previous year.

We look forward to an exciting 2021, where we hopefully will see fewer restrictions and a more normal day-to-day life.

As you probably already know, the global market is currently marked by severe price increases.

This goes for several types of raw materials such as steel and plastic, but the markets for energy and transport are also affected. The imbalance between supply and demand have unfortunately spread worldwide – not just to the European market.

HauCon keeps a close eye on the development and we try to stay ahead of the situation. We are continuously increasing our stock of standard items to ensure competitive prices and maintain our high consistency of supply.

We try to maintain the same level of service and prices as we have until now, but we find ourselves in an extraordinary situation that unfortunately forces us to notify of day-to-day prices and possible price increases in the nearest future.

Potential price adjustments will occur without further notice.

Therefore, we would like for you to take the necessary precautions concerning project quotes and tenders.

Our wish is that we through dialog, preparation, and planning, can continue our good cooperation and find the best possible solution for all parties.

We hope for your understanding and we look forward to a constructive cooperation in the future.

Should you have any questions concerning the above, we remain at your disposal and you are welcome to contact us.

Yours faithfully

Jan Haugaard

HauCon A/S
